YOUR SMILE IS HIS FOCUS

BY MEREDITH KNIGHT PHOTOGRAPHY BY ERIC KLEIMAN

Dr. Spiker Davis is in the first impression business. He spends his days helping TV personalities, civic leaders, business owners and the rest of us realize our dreams of a dynamic initial impression by creating state-of-the-art smile makeovers. Part science; part art, his smile makeovers take broken, chipped, crooked, damaged or discolored teeth and transform them into radiant smiles that broadcast confidence and good health. He's done it for thousands and he can do it for you.

His website at CosmeticDentistsHouston.com features a gallery of dramatic before/after photos. "Free computer simulation allows me to show you now how your smile will look, once we've made the necessary changes, so you can see your new smile before we even begin," he said. "Then you can guide and direct me to create the exact smile you want. From your initial free consultation on, everything we do is toward perfecting your smile."

A TRULY UNIQUE DENTAL EXPERIENCE

From the moment you walk into the elegant Cosmetic Dental Associates office, you know this experience won't be ordinary. From beautiful limestone walls to homey leather couches and armchairs, from flat screen TVs in spacious treatment rooms to the panoramic view through oversized windows, this is a space that was crafted with your comfort in mind.

*“You only have one chance
to make a first impression.”*

OSCAR WILDE

dental technology. “I like to say we have 22nd century equipment,” Dr. Davis said. “Dental technology is rapidly advancing and we’re pioneering the very latest and greatest; things like our Panorex X-ray machine which takes a complete 360 degree X-ray of a patient’s head while generating less radiation than a cell phone. We are able to mill one-appointment Cerec crowns, so those unreliable temporary crowns are a thing of the past. We produce our own porcelain veneers in our in-house lab and offer hospital-grade sterilization, also in-house. We’ve been at the forefront of pioneering veneer technology for 30 years. That experience enables us to do most veneers without grinding or shots.”

SMILE SPECIALIST

With technology such as lasers, intraoral cameras, digital X-rays and permanent titanium implants, Dr. Davis and his veteran staff can provide the very best in general dentistry. “With over 100 years combined experience, my staff has seen it all,” he said. “We are seeing our second generation of patients and are invested in educating them and partnering with them for a lifetime of optimum oral health. Over and above that, we are dedicated to providing premier cosmetic dentistry, so you look as great as you feel. We strive to be the best dental office you’ve ever been to.”

VOTED “BEST DENTIST IN HOUSTON”

Considering all of the above, it’s no wonder Cosmetic Dental Associates was ranked Best Dentist in Houston by Dr. Oogle. “Our goal is simple—to offer you the very best dental experience you’ve ever had,” Dr. Davis said. “We’re proud of all our five-star ratings that tell us we’ve done just that. Of course, I give all the credit to my stellar staff. Not a day goes by that I don’t hear compliments on them from patients and vendors alike.” If you’re ready for your own Hollywood smile makeover, contact Cosmetic Dental Associates at **713-784-2800** or **CosmeticDentistsHouston.com** to schedule your initial consultation. ///

NEXT-GENERATION TECHNOLOGY

Dr. Davis admits he’s a bit of a techno nerd. His office, at 1220 Augusta Drive, houses an impressive collection of dental artifacts, including a foot-pump operated drill, a 1930 Electrocautery Unit and antiquated dental implements, some of which will have you scratching your head, wondering what job they performed.

But on the other end of the scale, he has amassed the very latest next-generation
